ACADEMIC APPOINTMENTS

- | | |
|-------------|---|
| 2015 – | Robert J. and Elizabeth Flanagan Family Chair
Provost’s Distinguished Associate Professor
Strategy, Economics, Ethics, & Public Policy
Georgetown University |
| 2011 – 2015 | Assistant Professor of Strategy, Economics, Ethics, & Public Policy
Georgetown University |
| 2008 – 2011 | Assistant Professor of Philosophy, Research
Brown University |
| 2006 – 2008 | Research Fellow, Political Science
Brown University |

EDUCATION

- Ph.D. Philosophy, University of Arizona, 2002 - 2007
Dissertation: *The Best Moral Theory Ever: The Merits and Methods of Moral Theory*
Committee: David Schmidtz (chair), Mark Timmons, Michael Gill
- M.A. Philosophy, University of Arizona, 2005
- B.A. Philosophy, University of New Hampshire, Dec. 2001
Economics, Case Western Reserve University, 1997-2000.

RESEARCH INTERESTS

Political economy, commodification, voter behavior, voting ethics, political liberty, democratic theory, civic virtue, commerce and ethics, duties of competence and good faith, abuses of power, business ethics of higher ed.

PUBLICATIONS

Books

- 2018 *Cracks in the Ivory Tower: The Bad Business Ethics of Higher Ed*, with Philip Magness, under contract, Oxford University Press.
- 2017 *Global Justice as Global Freedom*, with Bas van der Vossen, under contract. Oxford University Press.
- 2016 *Against Democracy*, Princeton University Press.

From the jacket:

Jason Brennan

Jason.Brennan@georgetown.edu

Most people believe democracy is a uniquely just form of government. They believe people have the right to an equal share of political power. And they believe that political participation is good for us—it empowers us, helps us get what we want, and tends to make us smarter, more virtuous, and more caring for one another. These are some of our most cherished ideas about democracy. But, Jason Brennan says, they are all wrong.

In this trenchant book, Brennan argues that democracy should be judged by its results—and the results are not good enough. Just as defendants have a right to a fair trial, citizens have a right to competent government. But democracy is the rule of the ignorant and the irrational, and it all too often falls short. Furthermore, no one has a fundamental right to any share of political power, and exercising political power does most of us little good. On the contrary, a wide range of social science research shows that political participation and democratic deliberation actually tend to make people worse—more irrational, biased, and mean. Given this grim picture, Brennan argues that a new system of government—epistocracy, the rule of the knowledgeable—may be better than democracy, and that it’s time to experiment and find out.

A challenging critique of democracy and the first sustained defense of the rule of the knowledgeable, *Against Democracy* is essential reading for scholars and students of politics across the disciplines

2015 ***Markets without Limits***, with Peter Jaworski. Routledge Press.

From the jacket:

May you sell your vote? May you sell your kidney? May gay men pay surrogates to bear them children? May spouses pay each other to watch the kids, do the dishes, or have sex? Should we allow the rich to genetically engineer gifted, beautiful children? Should we allow betting markets on terrorist attacks and natural disasters?

Most people shudder at the thought. To put some goods and services for sale offends human dignity. If everything is *commodified*, then nothing is sacred. The market corrodes our character. Or so most people say.

In *Markets without Limits*, Jason Brennan and Peter Jaworski give markets a fair hearing. The market does not introduce wrongness where there was not any previously. Thus, the authors claim, the question of what rightfully may be bought and sold has a simple answer: if you may do it for free, you may do it for money.

Jason Brennan

Jason.Brennan@georgetown.edu

Contrary to the conservative consensus, they claim there are no inherent limits to *what* can be bought and sold, but only restrictions on *how* we buy and sell.

2014 ***Compulsory Voting: For-and-Against***, with Lisa Hill. New York: Cambridge University Press.

From the jacket:

In many democracies, voter turnout is low and getting lower. If the people choose not to govern themselves, should they be forced to do so? For Jason Brennan, compulsory voting is unjust and a petty violation of citizens' liberty. The median non-voter is less informed and rational, as well as more biased than the median voter. According to Lisa Hill, compulsory voting is a reasonable imposition on personal liberty. Hill points to the discernible benefits of compulsory voting and argues that high turnout elections are more democratically legitimate. The authors - both well-known for their work on voting and civic engagement - debate questions such as: Do citizens have a duty to vote, and is it an enforceable duty? Does compulsory voting violate citizens' liberty? If so, is this sufficient grounds to oppose it? Or is it a justifiable violation? Might it instead promote liberty on the whole? Is low turnout a problem, or a blessing? Does compulsory voting produce better government? Or, might it instead produce worse government? Might it, in fact, have little effect overall on the quality of government?

2014 ***Why Not Capitalism?*** New York: Routledge Press.

From the jacket:

Most economists believe capitalism is a compromise with selfish human nature. As Adam Smith put it, "It is not from the benevolence of the butcher, the brewer, or the baker, that we expect our dinner, but from their regard to their own interest." Capitalism works better than socialism, according to this thinking, only because we are not kind and generous enough to make socialism work. If we were saints, we would be socialists.

In *Why Not Capitalism?*, Jason Brennan attacks this widely held belief, arguing that capitalism would remain the best system even if we were morally perfect. Even in an ideal world, private property and free markets would be the best way to promote mutual cooperation, social justice, harmony, and prosperity. Socialists seek to capture the moral high ground by showing that ideal socialism is morally superior to realistic capitalism. But, Brennan responds, ideal capitalism is superior to ideal socialism, and so capitalism beats socialism at every level.

Clearly, engagingly, and at times provocatively written, *Why Not Capitalism?* will cause readers of all political persuasions to re-evaluate where they stand vis-à-vis economic

priorities and systems—as they exist now and as they might be improved in the future.

2016: Translated into Portuguese, Gradiva Press.

2012 ***Libertarianism: What Everyone Needs to Know***. Oxford: Oxford University Press.

From the jacket:

In *Libertarianism: What Everyone Needs to Know*, Jason Brennan provides a clear, straightforward, yet thorough introduction to libertarian and classical liberal political thought. He reveals the ideas behind this growing political movement and explains how libertarianism offers a third-way alternative to traditional left and right politics. *Libertarianism* also corrects popular misconceptions. It is not about simple-minded paranoia about government, and libertarians are not out to justify the excesses of Big Business or to protect the interests of the rich and powerful. Rather, libertarianism, especially in its oldest “classical liberal” incarnations and in its newest “bleeding heart” wave, is animated by benevolence and a deep concern for the most vulnerable members of society.

2014: Translated into Turkish, Liberte Publishing.

2013: Translated into Mongolian, NEPKO publishing.

2011 ***The Ethics of Voting***. Princeton: Princeton University Press.

From the jacket:

This provocative book challenges our fundamental assumptions about voting, revealing why it is not a duty for most citizens and why, in fact, many people owe it to the rest of us *not* to vote. Bad choices at the polls can result in unjust laws, needless wars, and calamitous economic policies. Jason Brennan shows why voters have duties to make informed decisions in the voting booth, to base their decisions on sound evidence for what will create the best possible policies, and to promote the common good rather than their own self-interest. They must vote well—or not vote at all.

2017: Translated into Japanese, Keiso Shobo.

2012: Expanded paperback edition of *The Ethics of Voting*, with new afterword “How to Vote Well”.

2010 ***A Brief History of Liberty***, with David Schmidtz. Oxford: Wiley-Blackwell.

From the jacket:

Through a fusion of philosophical, social scientific, and historical methods, *A Brief History of Liberty* provides a comprehensive, philosophically-informed portrait of the elusive nature of one of our most cherished ideals.

- Offers a succinct yet thorough survey of personal freedom

- Explores the true meaning of liberty, drawing philosophical lessons about liberty from history
- Considers the writings of key historical figures from Socrates and Erasmus to Hobbes, Locke, Marx, and Adam Smith
- Combines philosophical rigor with social scientific analysis
- Argues that liberty refers to a range of related but specific ideas rather than limiting the concept to one definition

2013: Translated into Italian and reprinted. Torino: IBL Libri.

Edited Book/Anthology

2017 ***The Routledge Handbook of Libertarianism***, with Bas van der Vossen and David Schmidtz. New York: Routledge, under contract (manuscript submitted).
